Abstract of JP9028642

PROBLEM TO BE SOLVED: To provide a high altitude cleaning device capable of freely cleaning a perpendicular part or an inclined part like a wall surface in a high altitude as well as a horizontal part like a ceiling surface.

SOLUTION: The device is provided with a cleaning unit 2 for covering and cleaning an object to be cleaned, means 3 for holding the cleaning unit 2 at the upper end, means 4 for elevating/lowering the cleaning unit 2 through the holding means 3, and a car body freely movably structured for supporting the elevation means 4; the device is so structured that the cleaning unit 2 is turnable around a supporting shaft extending horizontally.
